DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group I (claims 1-7) in Paper No. 12 is acknowledged.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

2. Claims 1, 2, 5 and 6 are rejected under 35 U.S.C. 102(e) as being anticipated by PCT Publication WO 97/42462 issued to Martinez-Tovar et al. ("MT"). MT discloses a semiconductor bridge device 10, comprising: a cap 42; a header 44; explosives 36; electrically conductive lead pins 32a/b; an electrically non-conducting substrate 12; an electrically-conducting material deposited on the substrate 14, said material defining a bridge 14c connecting a pair of spaced-apart pads 14a/b; a pair of spaced-apart metallized lands, each land comprising a base layer comprised of titanium, an intermediate layer comprised of titanium and tungsten, and a top layer comprised of tungsten; and, an electrical conductor connected to each of the metallized lands.

(Claim 1).

Art Unit: 3641

3. With respect to claim 1, MT discloses applicant's device as described above.

(See also, Tovar, figures 3A and 7A).

4. With respect to claim 2, MT discloses reactive materials titanium (electrical resistivity = $40 \times 10^{-8} \Omega\text{m}$) and tungsten (resistivity = $5 \times 10^{-8} \Omega\text{m}$).

5. With respect to claim 5, MT discloses several layers of up to 350 Angstroms and up to 1.2 microns. (Col. 7, ll. 61-67 to col. 8, ll. 1-6).

6. With respect to claim 6, MT discloses an SCB device further comprising an integrated diode formed by an interface of the insulating material 14 with lands 16a/b.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over MT in view of U.S. Patent No. 4977105 issued to Okamoto et al. ("Okamoto"). MT discloses a semiconductor bridge device as described above. However, MT does not disclose a resistive material comprising boron. However, it is well known in the semiconductor art to use boron as a means of lowering the electrical resistance of a non-metal film layer. (See, Okamoto, col. 4, ll. 26-56).

Allowable Subject Matter

4. Claim 7 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
